EXPECTED 24 / COUNTED 19

Say what happened. Know where you stand.

Kepti is the conversational business ledger for small shops. Everyday chat becomes a confirmed record; connected sales, stock, cash and credit make the next useful action visible.

Founder-cleared name · Nigeria-first · Small retailers

The notebook kept the sales.

When the founder was young, they were put in charge of the family shop and asked to record daily sales in a notebook. At month-end, those notes still could not reconcile with the stock left on the shelves.

That gap is Kepti’s starting point: connect what sold to what came in, what went out, what was bought on credit, and what is still unexplained.

> “A record should help you see the whole shop.”

THE PROMISE

Tell Kepti what happened.
Know where you stand.

Kepti keeps sales, stock, cash, and credit connected, then points out what needs attention.

Made from the ledger.

A clear, low-friction identity for a product owners and staff use at the counter.

kepti.

THE MARK

A ledger spine branches into two entries. The yellow endpoint marks a useful detail brought into view.

kepti

Lowercase wordmark · amber full stop

COLOR

BOTTLE INK	OFF-WHITE	SIGNAL YELLOW	LEDGER GREY
#0D2A1C	#F7F7F7	#F6E016	#EBEBEB

Use bottle ink for structure. Yellow marks the next useful thing. Keep the off-white and grey surfaces calm; reserve red for a genuine risk state.

DISPLAY / IMBUE

Know where you stand.

PRODUCT / ALBERT SANS

45 bottles left

Numbers and labels read quickly.

Logo use: keep proportions and clear space. No gradients, glow, robot, sparkle, or generic chat bubble.

One sentence.
A record that adds up.

The user stays in control. Kepti shows what it understood and what each confirmed event changes.

SHOPKEEPER'S WORDS

"I bought two crates of malt from Musa on credit. I'll pay him Friday."

Example shop data. The catalogue is set to 24 bottles per crate.

STOCKTAKE

24 expected / 19 counted

−5 · unresolved

EXPIRY

6 yoghurt · batch 04

5 days to expiry

A barcode is optional. Product price comes from the Kepti catalogue; expiry belongs to a recorded batch. A stock difference stays unresolved until there is evidence.

Natural.
Never forced.

A capable shop supervisor: quick to understand, careful with the record, respectful with people.

GOOD · PLAIN AND SPECIFIC

“Expected 24, counted 19. I found 3 sales and 2 returns. Nothing else explains the difference yet.”

NEVER · NO BLAME WITHOUT EVIDENCE

“Your attendant may have stolen five items.”

PROACTIVE PROMPTS

LOW STOCK

“You have 4 bottles left. You usually sell 3 a day, and delivery takes two days. Want a reorder list?”

SUPPLIER DUE

“Musa’s ₦18,000 balance is due Friday. Remind me Thursday?”

NEAR EXPIRY

“Six yoghurts from batch 04 expire in five days. Want a reminder tomorrow?”

GAP FOUND

“This item has a selling price but no recent cost, so profit is unknown.”

Start with clear Nigerian English. Validate Pidgin in real shop conversations; add Yoruba, Hausa, and Igbo only when Kepti understands them reliably.

A launch with a reason.

Show the notebook problem, then let the product interaction make the point.

KEPTI. / SMALL SHOP RECORDS

The sales
were in the book.
The stock still
didn’t add up.

SAY WHAT HAPPENED. KNOW WHERE YOU STAND.

CAPTION · FOUNDER VOICE

“I used to record the shop’s daily sales in a notebook. At month-end, the stock still didn’t reconcile. Kepti is being built to keep the whole story together: what sold, what came in, what is owed, and what needs checking.”

KEPTI
Business records, by conversation.

Use the founder’s real story and show the conversation-to-ledger result. No borrowed testimonial or invented customer claim.

Say what happened. Know where you stand.

Careful with what it keeps.

Kepti should bring information forward without overreaching its evidence or the owner’s authority.

CONFIRM

Show consequential records before saving.

EXPLAIN

Tie every alert to a date, count, or transaction.

RESPECT

Never infer theft or blame a person from a stock difference.

LEAVE CONTROL

Ask before changing prices, placing orders, sending messages, or recording payment.

LANGUAGE

Start with clear Nigerian English. Validate Pidgin in real shop conversations; add Yoruba, Hausa, and Igbo only when Kepti understands them reliably.

Never force slang. Naturalness comes from understanding the shopkeeper, not imitating them.

Kepti keeps the record connected and brings the next useful thing into view.
