

PROFICIENT

ELECTRICAL

Care in every connection.

IDENTITY / VISUAL LANGUAGE / EVERYDAY APPLICATIONS

THE LIGHT MARK

Electrical, at first glance.

Confidence, before the first switch.

From the first conduits in a new building to final fittings, repairs and solar installation. Proficient Electrical brings a clear, practical identity to electrical work in Ibadan and Oyo State.

01

Precision

Purposeful details. A structured mark. Layouts that feel carefully measured.

02

Reassurance

A calm colour palette and plain language that help customers feel informed.

03

Respect

Clear estimates, practical explanations and consideration for the customer's space.

BRAND LINE

Care in every connection.

Light. Power. Proficient.

PROFICIENT

ELECTRICAL

The light symbol

A recognisable bulb holds an electrical filament with a mauve terminal. The symbol connects the name directly to light and electrical work.

The wordmark

A bold uppercase name balances the light symbol. The spaced electrical descriptor keeps the trade immediately clear.

One identity, different footprints.

SOFT WHITE

RGB 250 / 249 / 247

#261831

INK PLUM

RGB 38 / 24 / 49

Purple and mauve preserve the original brand's colour family. Soft White opens up the compositions; Ink Plum provides contrast for longer text and dark applications.

Working palette derived visually from the supplied screenshot. For print, match a physical proof to the approved colours. Keep mauve for accents and large details; use purple or ink for small text on white.

A stronger name. A calmer voice.

PROFICIENT

DEJAVU SANS BOLD

Use the bold family for the wordmark and short, assured headlines. Uppercase gives the name a confident, practical presence.

Care in every connection.

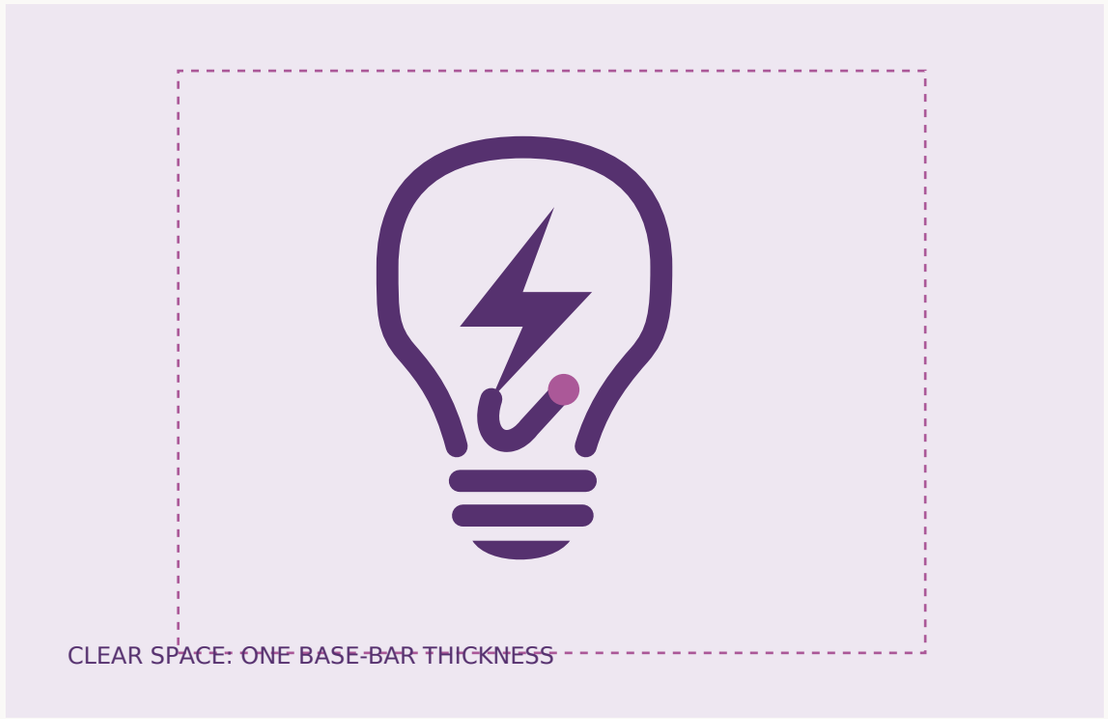

Tell us what needs attention. We will talk through the next step.

DejaVu Sans / Regular

Use regular-weight body text for descriptions, estimates and contact information. Pair a short headline with one useful explanation and one action.

DIGITAL STARTING POINTS: HEADLINE 40-56 PX / BODY 16-18 PX / LABEL 12-14 PX

Keep the mark unmistakable.

Leave room around it.

Use the bulb base as a guide. Leave at least one full base-bar height clear around the outermost logo edges.

Keep it readable.

Start at 40 px / 10 mm for the symbol and 220 px / 45 mm for the full signature. Proof fine details before embroidery.

Keep

Original proportions. Solid brand colours. Clear backgrounds.

Avoid

Stretching, extra clip art, drop shadows, gradients or thin outlines.

Simplify

Use the symbol alone when the full name becomes too small.

The shape becomes the system.

REPEAT WITH RESTRAINT

Every connection deserves care.

A frame. A crop. A quiet detail.

Pattern

Use tonal repeats on packaging, folders and the reverse of printed materials. Leave text on a clear panel.

Framing

Use an enlarged bulb detail at a corner or edge. Keep full logos clear of the decorative shape.

SUPPORTING COLOUR / LAVENDER MIST #EEE7F1

Sound like someone worth calling.

Clear enough to understand. Considerate enough to trust.

MOBILE PROFILE / CONCEPT

Recognisable from across the street.

Let the name lead. Keep the number large. Use a single field of purple with a clean margin around the signature.

On a vehicle or fascia, use the primary signature and contact number. Keep service lists short and only include services the business actually offers.

Made for the working day.

WORKWEAR & CUSTOMER TOUCHPOINTS / VISUAL APPLICATION CONCEPT

Consistency is the finishing touch.

01 Use the same signature.

Use the primary horizontal logo wherever there is enough space. Reserve the symbol for compact placements.

02 Check the physical result.

Review a real-size sample for stitching, vinyl, stamps and business cards. Preserve the filament, terminal dot and open gaps.

03 Keep information accurate.

Use +234 808 014 9445 consistently. Add addresses, operating hours, services and qualifications only when confirmed.

04 Use photographs with purpose.

Choose actual finished work, clean details and tidy work areas. Keep text off busy backgrounds and avoid decorative electrical stock art.

PROFICIENT Care in every connection.

From construction to completion.

01

Conduit installation

Electrical building piping: protective routes for cables, planned before plastering and finishes.

02

New-build wiring

Electrical wiring from the construction stage through to sockets, switches and light fittings.

03

Electrical repairs

Assessment and repair of electrical faults. Discuss the problem and availability directly.

04

Solar installation

An installation conversation built around the property, appliances and power requirements.
